

Repetition Practice Problems with while loop

1. Write a program that takes a command-line argument n and prints a table of the powers of 2 that are less than or equal to 2^n till 256 is reached..
2. Find the Magic Number
 - a. Ask the user to think of a number n between 1 to 100
 - b. Then check with the user if the number is less than $n/2$ or greater
 - c. Repeat till the Magic Number is reached..
3. Extend the Flip Coin problem till either Heads or Tails wins 11 times.
4. Write a Program where a gambler starts with Rs 100 and places Re 1 bet until he/she goes broke i.e. no more money to gamble or reaches the goal of Rs 200. Keeps track of number of times won and number of bets made.
